WARNING

Read, understand, and follow all instructions and warnings on the machine and in this manual before operating.

Use extreme care when handling gasoline. Gasoline is extremely flammable and the vapors are explosive. Never fuel the machine indoors or while the engine is hot or running. Extinguish cigarettes, cigars, pipes and other sources of ignition.

If your home's wiring system is not a three-wire grounded system, do not use this electric starter under any conditions.

If your home electrical system is grounded, but a three-hole receptacle is not available, do not use your snow thrower's electric starter.

Gas & Oil Fill-Up

Service the engine with gasoline and oil as instructed in the separate engine manual packed separately with your snow thrower. Read instructions carefully.

Starting The Engine

1. Attach spark plug wire to spark plug. Make certain the metal loop on the end of the spark plug wire (inside the rubber boot) is fastened securely over the metal tip on the spark plug.
2. Make certain both the auger control and drive control are in the disengaged (released) position.
3. Move throttle control up to FAST position. Insert ignition key into slot. Make sure it snaps into place. Do not attempt to turn the key.

NOTE: The engine cannot start unless the key is inserted into ignition switch.

Electric Starter (on certain models)

1. Determine that your home's wiring is a three-wire grounded system. Ask a licensed electrician if you are not certain.

WARNING: The optional electric starter is equipped with a grounded three-wire power cord and plug, and is designed to operate on 120 volt AC household current. It must be used with a properly grounded three-prong receptacle at all times to avoid the possibility of electric shock. Follow all instructions carefully prior to operating the electric starter.

If you have a grounded three-prong receptacle, proceed as follows:

1. Plug the extension cord into the outlet located on the engine's surface. Plug the other end of extension cord into a three-prong 120-volt, grounded, AC outlet in a well-ventilated area.
2. Rotate choke control to FULL choke position (for a cold engine start).

NOTE: If the engine is already warm, place choke control in the OFF position instead of FULL.

3. Push the primer two or three times for cold engine start, making sure to cover vent hole in the center of the primer when pushing.

NOTE: DO NOT use primer to restart a warm engine after a short shutdown.

4. Push starter button to start engine.
5. Once the engine starts, immediately release starter button.

6. As the engine warms, slowly rotate the choke control to the OFF position. If the engine falters, quickly rotate the choke control back to FULL and then slowly into the OFF position again.
7. When disconnecting the extension cord, always unplug the end at the three-prong wall outlet before unplugging the opposite end from the snow thrower.

Recoil Starter

1. Rotate choke control to FULL choke position (cold engine start).

NOTE: If the engine is already warm, place choke control in the OFF position instead of FULL.

2. Push the primer two or three times for cold engine start, making sure to cover vent hole in the center of the primer when pushing.

NOTE: DO NOT use primer to restart a warm engine after a short shutdown.

NOTE: Additional priming may be necessary if the temperature is below 15° F. (-9° C).

3. Grasp the recoil starter handle and slowly pull the rope out. At the point where it becomes slightly harder to pull the rope, slowly allow the rope to recoil.

4. Pull the starter handle with a firm, rapid stroke. Do not release the handle and allow it to snap back. Keep a firm hold on the starter handle and allow it to slowly recoil.

5. As the engine warms, slowly rotate the choke control to the OFF position. If the engine falters, quickly rotate the choke control back to the FULL position and then slowly into the OFF position again.

NOTE: Allow the engine to warm up for a few minutes after starting. The engine will not develop full power until it reaches operating temperature.

Stopping The Engine

Run engine for a few minutes before stopping to help dry off any moisture on the engine.

- To help prevent possible starter freeze-up, proceed as follows:

Electric Starter (on certain models)

1. Connect extension cord to the electric starter outlet on the engine, then to 120 volt AC outlet.
2. With the engine running, push the starter button and allow the starter to spin for several seconds. The noise made by the starter is normal. The engine's starter is not being harmed.

I only had about 12 months of use in a residential garden. How much is a CÄ © Sped King King Cutter from Bunnings? Less spectacle is sold for \$ 269 for \$ 269 for \$ 239 today, both articles can be taken home for only \$ 249! That is a great savings! What good is the surface of the King of the Cä © Sped? The King of the Cä © Sped runs, begins and cuts brightly. It is known and reliable, very easy to use and care. I wish I would have bought it some years ago, but he's great. Enjoy ... It has 2 x Husos separated each with a single blade (~ 21 "each) under the unique mallet to give 42". Lawn King 24/42 5.0 (2) Ride-on Mowers Ride-on Moweers Price (PVP) category? \$ 4,199.00 \$ 4,949.00? Not without font of gasoline feeding 13 rings more ... Kubota Riding Lawn Mowers are first line, with many models to choose from. If you are looking to buy one, the basic research for the prices of the new kubotas can help you make sure you get a good treatment. There are some excellent options to consider. Check Kubota distributors when it comes to obtaining information about New Kubota strawberries, there are not many better places than official distributors. Of course, these locations can also have the highest price. But you can be sure that you are getting the best cutter possible, with the opportunity to sign up for the Orange Protection Program. That means you can get guarantees extended in your articles for a couple of extra years, which is not a bad idea considering Kubotas are expensive. In addition, many distributors have service centers to help keep their cutters in the form of a tip. Even if you are not planning to buy a cutter in a dealer, it may be worth calling and finding out what the model you want. That way, you can understand the market value of what you are looking for. While most people associate eBay with the purchase of items and have them sent, there are Kubota mowers available on the site that are available to collect locally. That should save you money on shipping costs when you buy used. Or, choose to be sent. Unlike Craigslist, there is buyer protection so if the item is not as described, you have the option to return it. Craiglist Considering how big Kubota lawn cutters are, getting a good deal might require you to find a used one near where you live. Craigslist is a great resource for local vendors. However, since you are likely to be dealing with an individual instead of a company, make sure you do your due diligence before delivering the cash. Make sure the article is in good order of work, and ask about any repair or service history before making a decision. Tractor House Although you might find Kubota lawn lawn lawn lawn mowers on many auction sites, Tractor House is a good optionspecializes in machinery. If you are open to buying a cutter used, you can often get a good deal. You can see how the prices of Kubota sewers in the second-hand market, and check inventory of the entire country. Shipping is available, but can be expensive depending onFar is the cutter. Petesimilar machinery to the tractor house, Machinery Pete is an auction site that specializes in the sale of used equipment. There is a great number of Spedes de Cä © Sped Kubota available allä, and the team is classified as HP. That makes more fierce sailing for what you are looking for.
